Broadband Service and Rates

Mayor Kenny Alexander
City of Norfolk
810 Union Street
Norfolk, VA 23510

The undersigned are proud investors in the Norfolk Innovation Corridor, which strives to promote the growth of technology businesses located in or adjacent to the NIC “technology zone” established under Virginia law by the Norfolk City Council. We endorse the efforts of the NIC Board of Directors, generally, and the NIC Innovation Infrastructure Committee, specifically, to advocate for better high-speed broadband service, at nationally competitive rates, to serve the growing cluster of technology-oriented businesses and organizations present in the Norfolk Innovation Corridor.

Thank you in advance for your cooperation with the efforts of the NIC to improve the business climate in our area through the enhancement of this critical piece of our innovation infrastructure.

Very truly yours,

757 ACCELERATE
